

HARIHARASUDAN S

Full-Stack AI Engineer | AI Agents & Automation | LLM Systems | Data Scientist
sureshhariharasudhan7@gmail.com | 7338834982 | Chennai 600099 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack AI Engineer with 8+ months of professional experience building LLM-powered applications, Agentic AI systems, and RAG pipelines using Python, FastAPI, Flask, and React. Proficient in AI Agents, MCP integration, VectorDB, Microsoft Azure AI Foundry, prompt engineering, MLOps, and AI safety. Deployed production systems supporting 500+ concurrent users with hallucination mitigation and deterministic evaluation.

WORK EXPERIENCE

SteamCube AI | Junior AI Engineer

06/2026 – Present | Chennai

- Currently building an Agentic AI-powered Learning Management System (LMS) assistant, leveraging LLMs, RAG pipelines, and VectorDB-based retrieval for intelligent, context-aware learning support.
- Working with Microsoft Azure AI Foundry for model orchestration, deployment, and evaluation of generative AI solutions within enterprise-grade AI workflows.
- Collaborating on prompt engineering, AI safety mechanisms, and MCP-compatible integrations to ensure reliable, schema-enforced model behavior in production.

NextWealth | Full-Stack AI Engineer (Internship – Onsite)

08/2025 – 04/2026 | Bengaluru

- Architected end-to-end AI evaluation systems with deterministic LLM pipelines, strict JSON schema validation, and hallucination mitigation for automated PASS/FAIL grading workflows.
- Built a multimodal Image Annotation & Evaluation System integrating vision-language models (LLaVA) with RAG and Agentic AI workflows via REST APIs and React frontend.
- Engineered prompt engineering strategies, AI safety mechanisms, and MCP-compatible output constraints for reliable, schema-enforced model behavior at scale.

Greatify AI | AI Engineer (Internship – Onsite)

05/2025 – 06/2025 | Chennai

- Built an AI-powered exam evaluation system using OCR, NLP, and Generative AI to automate grading, deployed with Streamlit and performance-tracking dashboards.
- Collaborated in an Agile/Scrum setup with CI/CD workflows aligned to ITSM best practices; improved model accuracy through iterative stakeholder feedback.

PROJECTS / OPEN-SOURCE

LLM-Powered E-Commerce Product Content Evaluation (Flipkart Use Case)

03/2026

Tech: Python, Ollama, LLaMA 3.1 (8B), Agentic AI, Prompt Engineering, Automation, MLOps

- Designed an Agentic AI platform for automated product content generation and rubric-based LLM evaluation at scale, with hybrid scoring combining deterministic rule-based validation and anti-hallucination safeguards.
- Built bulk automation pipelines for scalable per-product scoring with threshold-based decision logic and MCP-compatible structured outputs.

AI-Driven Image Description and Quality Assessment System

02/2026

Tech: Python, Flask, React, LLaVA, LLaMA 3.1 (8B), Ollama, VectorDB, MLOps

- Designed a full-stack multimodal AI system integrating vision-language models (LLaVA + LLaMA 3.1) for structured caption generation and rubric-based quality evaluation with PASS/FAIL scoring.
- Engineered JSON schema validation and hallucination detection pipelines; built REST APIs and React frontend for real-time AI Agents evaluation visualization.

Online Exam-Oriented Code Assessment Platform

01/2026

Tech: Python, FastAPI, PostgreSQL, React, Docker, Render, Netlify, Automation

- Architected a secure full-stack coding examination platform with real-time code submission, automated test-case validation pipelines, and automation-driven integrity controls.
- Deployed production-ready system on Render + Netlify via CI/CD; handled 500+ concurrent students with zero downtime.

Agentic AI-Powered LMS Assistant

02/2026

Tech: Python, FastAPI, Flask, React, LangChain, RAG, VectorDB, Embeddings, AI Agents

- Built an Agentic AI LMS assistant with a RAG pipeline enabling natural language querying of course materials using LLMs, VectorDB embeddings, and contextual response generation.
- Developed REST APIs (FastAPI/Flask) with a React interface for real-time AI-assisted learning with MCP-compatible integrations.

Speech-Based Emotion Recognition System for Post-Trauma Monitoring

01/2025

Tech: Python, Scikit-learn, Librosa, NumPy, SVM

- Developed an ML-based speech emotion recognition system using SVM with MFCC, chroma, and spectral feature extraction pipelines via Librosa for emotional state classification.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, PostgreSQL

AI / ML: LLMs (GPT, Gemini, Ollama), Generative AI (GenAI), AI Agents, Agentic AI, RAG, VectorDB, MCP (Model Context Protocol), Prompt Engineering, Multimodal AI, MLOps, Model Evaluation, AI Safety, Hallucination Mitigation, Automation, Embeddings, LLM Fine-Tuning, Semantic Search, NLP (Natural Language Processing), Computer Vision, Transformers, Hugging Face

Cloud & AI Platforms: Microsoft Azure AI Foundry, Azure OpenAI Service, OpenAI API, Cloud Computing

Frameworks: Flask, FastAPI, Django, React, LangChain, NumPy, Pandas, Scikit-learn, Streamlit

Databases: MySQL, PostgreSQL, Vector Databases

DevOps & Cloud: Docker, Kubernetes, Git, CI/CD, REST APIs, Microservices, Render, Netlify, Postman

Tools: Tableau, Excel, Librosa, VS Code

EDUCATION

SRM Institute of Science and Technology, Ramapuram, Chennai

2024 – 2026

MCA – Computer Application | CGPA: 9.8

Saveetha College of Liberal Arts and Sciences, Chennai

2021 – 2024

BCA – Computer Application | CGPA: 8.3

CERTIFICATIONS

- Data Science and ML with GenAI Advanced Program – NIIT
- Python Programming – NIIT
- Programming Using Java – NIIT
- Privacy and Security in Online Social Media – NPTEL
- Developing Web Applications Using Servlets and JSP (Level 1) – NIIT
